# ABOUT US

## VISION

To become a trailblazing, sustainable national organization that values its people, prioritizes safety, upholds honesty, and fosters partnerships.

## MISSION

To provide our customers with outstanding service and measurable value through our team of safety-conscious and responsible individuals.

At Lux Traffic, safety is more than a priority; it is our promise. With years of industry experience, including ongoing partnerships with the City of Nedlands, Town of Cambridge, and leading civil construction firms, we deliver trusted and efficient traffic management solutions across Western Australia.

Formerly known as Vigilant Traffic Management Group, we bring a proven track record in planning, approvals, and implementation. Our experience spans from short-term maintenance work to major infrastructure projects and large-scale events.

We are a preferred WALGA supplier, with previous long-term contracts including the City of Vincent for 12 years, City of Wanneroo for 3 years, and City of Bayswater for 3 years. Our team is known for fast lead times, strong relationships with Road Traffic Managers, and custom Traffic Guidance Schemes tailored to your project requirements.

Backed by Employsure for expert support in workplace relations and safety compliance, Lux Traffic operates to the highest standards of professionalism and care. We ensure your project runs smoothly and safely from start to finish.

# PROJECTS

# PROJECTS

At Lux Traffic Management, we combine compliance, responsiveness, and local knowledge to deliver high-quality traffic management solutions across Western Australia. From short-term maintenance call-outs to complex infrastructure and power projects, our team is known for fast approvals, adaptable planning, and smooth on-site execution.

Our broader client base includes contractors across landscaping, plumbing, electrical, and drainage works, allowing us to tailor our solutions across varied project types and scales.

Previous Local Government Contracts:

- City of Vincent – 12 years
- City of Wanneroo – 3 years
- City of Bayswater – 3 years
- Preferred WALGA Supplier

## LOCAL GOVERNMENT PROJECTS

### Town of Cambridge

As the contracted traffic provider, Lux Traffic supports roadworks, maintenance, and major events across the Town.

Key works include:

- Kerbing modifications at Ruislip St and Vincent Ave, Wembley
- Road resurfacing and kerb installation across multiple streets including Berkeley Cr, Hornsey Rd, and Kirkdale Ave
- Road rehabilitation: Cambridge Street, West Leederville
- ANZAC Day event support
- Ongoing footpath, drainage, and road maintenance

### City of Nedlands

Our role includes ongoing support for council-led works, infrastructure upgrades, and community events.

Recent jobs include:

- Road inspections across Railway Rd, Stubbs Tce, and Alfred Rd
- Greenway and drainflow maintenance
- Footpath and kerb repairs across various sites
- ANZAC Day event management at Birdwood Pde and Waratah Ave

## Densford Civil

Our long-standing partnership with Densford spans more than five years, supporting both residential and commercial developments.

Highlighted projects:

- Anstey Avenue Road Redevelopment
- Beeliar Drive Roundabout
- North Coogee Residential Works
- We provide tailored traffic control solutions to suit everything from simple layouts to high-complexity works with local governments and private developers

## Civcon, MME, and Platinum

Our company has built a strong and trusted working relationship with Civcon, MME, and Platinum through our consistent delivery of high-quality traffic management services across several key infrastructure projects.

Recent collaborative projects include:

- Hay Street Perth City Centre
- Burrambie Way, Gnangara/Water Corp
- Main Street, Osborne Park
- Meadow Springs, Lakeland

## CIVIL CONSTRUCTION PROJECTS

## Geographe Underground Services (GUS)

Lux Traffic has partnered with GUS on directional drilling and power installation works across both metro and regional areas.

Recent support includes:

- Mitchell Freeway Extension – Wanneroo Rd and Romeo Rd
- Kwinana Fwy Southbound Off-Ramp – South Street
- Stage 1 – L6 West Road, Bullsbrook
- Guger Street, Claremont – Light pole installations
- Fitzgerald Street, Northam – Cable and conduit installation
- Ocean Drive, Hillarys – Road closures for Western Power upgrades

Each of these projects required a tailored approach involving detailed long-term planning, traffic impact assessments, and close coordination with multiple parties.

We worked alongside principal contractors, subcontractors, utility providers, local councils, and road authorities to ensure all works were delivered safely, efficiently, and in compliance with regulatory standards.

Our team effectively managed both day and night operations, often under complex and high-traffic conditions. We provided end-to-end traffic management solutions, from the development of Traffic Management Plans (TMPs) and Traffic Guidance Schemes (TGSs) to on-site supervision and real-time adjustments in response to changing site conditions.

Our ability to anticipate potential challenges and maintain open lines of communication with all stakeholders has played a vital role in the successful delivery of these projects, on time, on budget, and with minimal disruption to the public.

# OUR DIFFERENCE

Fast turnaround on approvals from both Local Government and Main Roads

Tailored TMPs to suit any complexity, from generic TGS sets to multi-stage designs

Strong RTM relationships across the state, reducing approval bottlenecks

A reputation for reliable delivery, even in high-pressure or short-notice environments

# OUR SERVICES

# SCOPE OF WORK

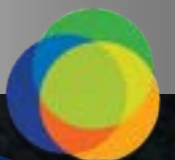

The scope of works, defined by our client, includes all necessary measures to ensure the safe movement of traffic and the protection of personnel and property through and around road reserve work sites, including during emergencies and after-hours situations.

This covers the supply of labour, materials, and equipment for traffic control services. These services will be performed in full compliance with the Conditions of a Contract, these Technical Specifications, the Main Roads Western Australia Traffic Management for Works on Roads Code of Practice, and AS 1742.3 (2009), under the supervision of the Principal's Representative.

Preparation and submission of traffic management plans

Maintenance and removal of temporary traffic control devices, controllers, signposting, lights, barriers, and other necessary items before and after road works

Traffic control in accordance with AS 1742.3 (2009), SAA HB81, and Main Roads Western Australia Traffic Management for Works on Roads Code of Practice, including any applicable revisions during the contract period

# OUR APPROACH

## Traffic Plan Process

- Customer TMP Request
- Traffic Management Plan
- Traffic Plan Drafting (In-House)

## Scheduling (via Traffio)

- Traffic Operations Scheduling
- Traffic Operations Booking
- Traffic Operation Site Setup

## Site Safety & Aftercare

- Traffic Site Audit
- Traffic Site Clean-Up
- Traffic Site Aftercare

## Internal Office Support

- Lux Traffic Office Training
- Lux Traffic Progress Reviews
- Lux Traffic Marketing and Planning

## TMP Approval Process

- Traffic Plan Submission
- Traffic Plan Approval
- Traffic Plan Return to Customer

## Staff Deployment

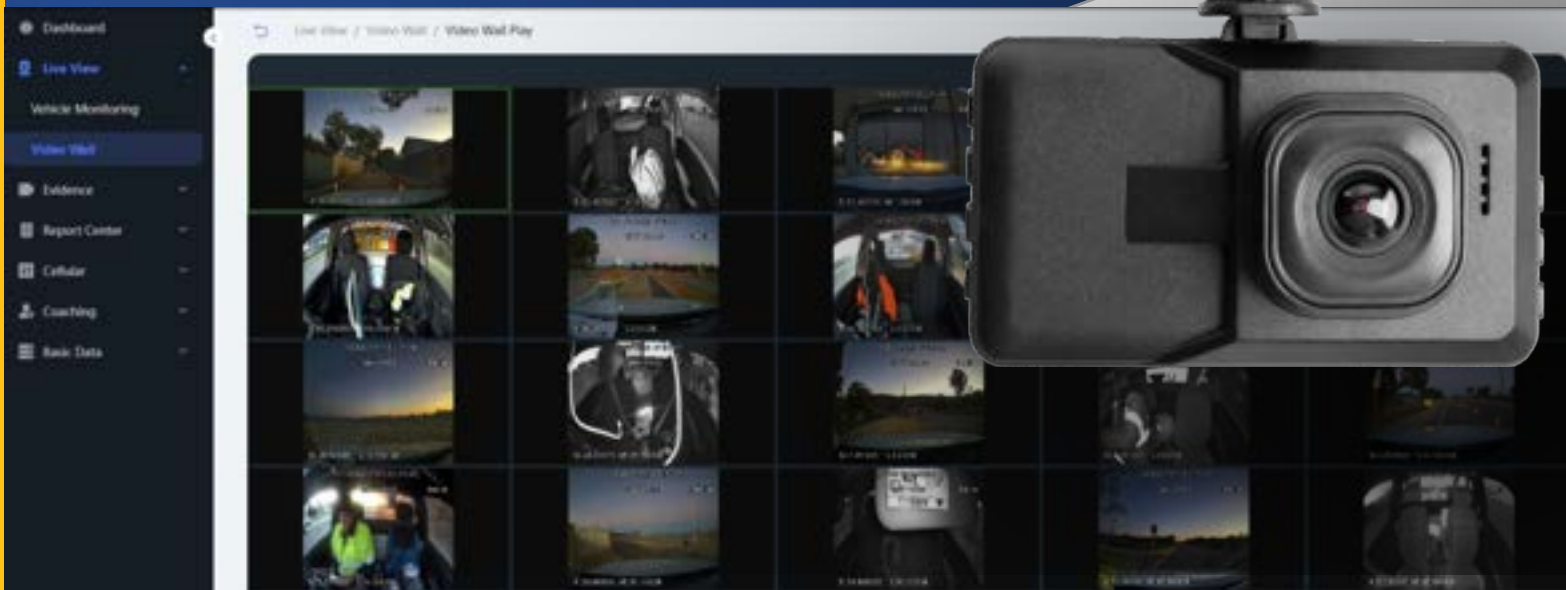

- Traffic Controller Allocation
- Traffic Controller On-Site
- Traffic Controller Safety

## Office Process Flow

- Customer Invoicing Preparation
- Customer Invoicing Submission
- Customer Follow-Up

# TECHNOLOGY & REAL-TIME TRACKING

Lux Traffic utilises the Traffio software as part of our traffic management system that integrates various technologies and methodologies to optimize planning, availability, enhance safety, and improve the overall efficiency for the delivery of a traffic management service.

All our vehicles are fitted with GPS/Dashcam systems, to monitor movements and record site conditions. This data can be visualised in real time from anywhere.

Daily audits of every site associated with traffic management signage and/or devices, irrespective of whether or not they are associated with an approved traffic management plan, can be audited and documented on a daily basis in consultation with the Principal's supervising officer.

**All our resources are incorporated in the software.**

Employees data, personal details, qualifications, limitations etc.

Vehicles

Arrow boards and Variable message boards.

Signs

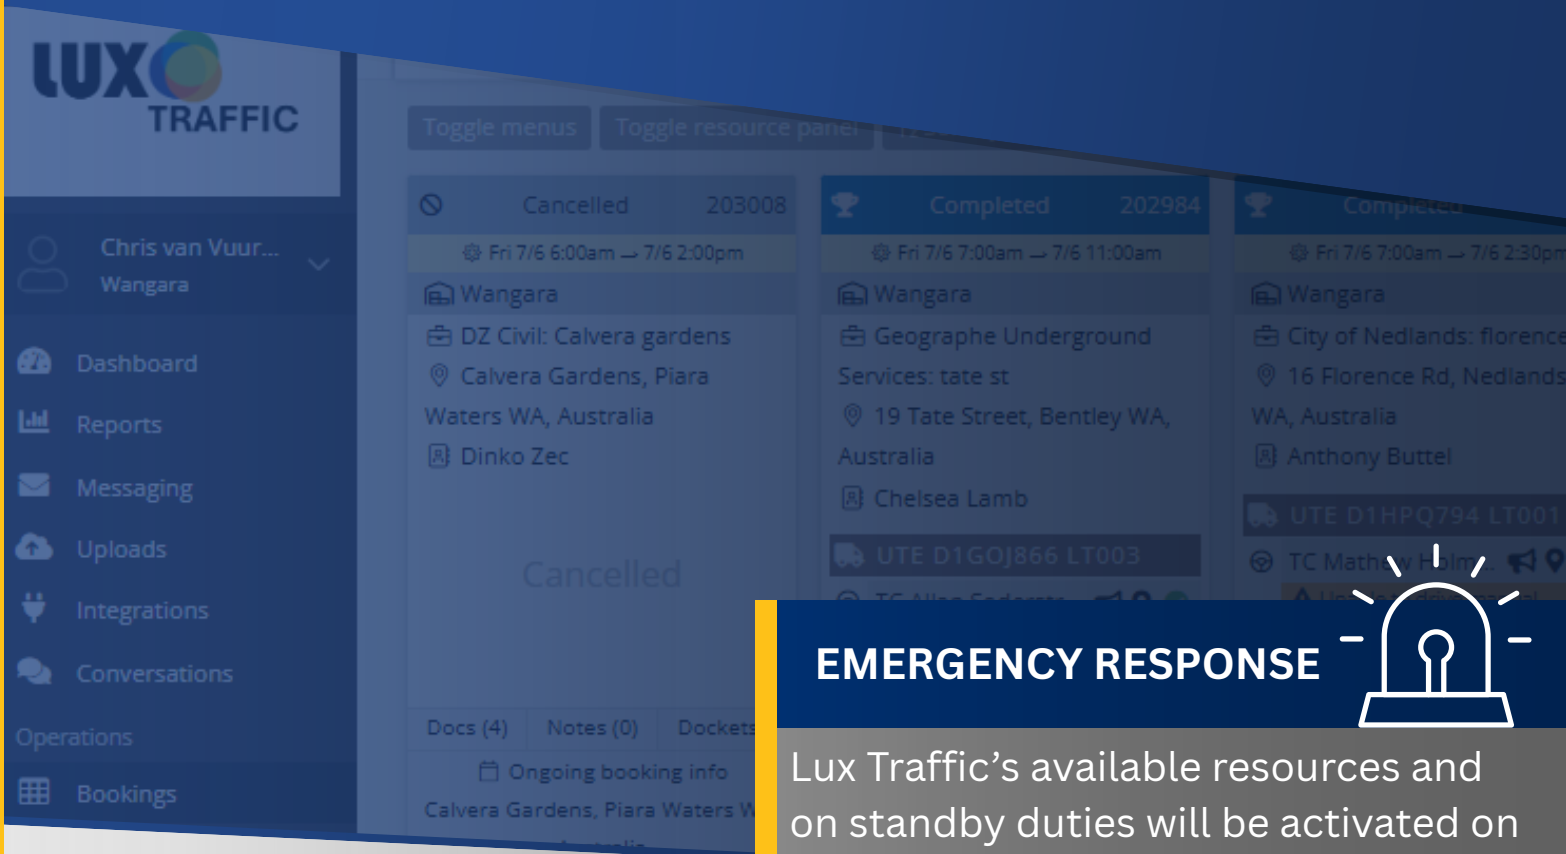

# RapidPlan

Rapid planning is being utilised for the drafting of simple and complex TMP's.

# PLANNING AND SCHEDULING

## EMERGENCY RESPONSE

Real-time bookings and confirmations allow us to quickly assess resource allocations and see fatigue and conflict alerts while booking and confirming your jobs.

Simple and intuitive scheduling and ensuring booking the right people for the job.

Lux Traffic's available resources and on standby duties will be activated on request from the Principal's Representative upon first becoming aware of an emergency or after hours call out scenario and giving as much detail as possible as to the nature of the situation.

Lux Traffic will then mobilise sufficient resources, to ensure that traffic is controlled in the specific situation.

As Lux Traffic is situated in Wanneroo area and 90% of our personnel is staying in the Wanneroo suburb's, mobilisation will be within 1 hour, as required. Should further resources be required, additional resources can be deployed.

# BOOKING PROCESS

Easy communication with staff via the Traffio app saves time, ensuring you can always reach who you need when you need them.

Access job details, attachments, compliance forms and more via the app.

**Live bookings and confirmations**

**Fatigue & conflict alerts**

**Mobile app**

**Colour coding capabilities**

**Avoid double bookings**

Alerts for double bookings and fatigue, leave allowances, and travel-time factoring helps you maintain compliance with every booking and removes human error from scheduling.

**Factors in leave availability**

**Automatically apply your fatigue policy**

**Set up block lists to prevent specific staff from working**

# FLEET RESOURCES

To meet the demands of new or expanding projects, Lux Traffic has the capability to acquire and fit out additional fleet vehicles to your specifications. This allows us to scale quickly and flexibly in response to client requirements, without compromising on service delivery or quality.

Lux Traffic operates a robust fleet consisting of 42 fully equipped traffic utes, 2 Truck Mounted Attenuators (TMAs) on long-term lease through Platinum, and a Crew Cab truck, ensuring we can deliver effective traffic management services across the Perth metropolitan area. Each vehicle is outfitted with advanced technology and essential tools to uphold the highest standards of safety and operational efficiency.

We maintain Perth Metro-wide coverage, supported by a workforce of skilled traffic controllers, additional personnel through our casual system, as well as experienced planners and operational staff. This ensures seamless mobilisation, efficient resourcing, and consistent project execution.

Our strong partnerships with some of Perth's leading fleet dealers further enhance our operational capacity. These relationships enable us to expand our fleet rapidly and access high-quality vehicles and equipment, reinforcing our commitment to reliable and scalable traffic management solutions.

# TRUCK MOUNTED ATTENUATOR

# TEAMS & ROLES

Lux Traffic assigns a dedicated Contract Manager to oversee a client/contract, coordinating with our operations and administrative teams. We are committed to fast response times, backup equipment, and 24/7 availability for callouts.

To efficiently meet contract requirements, dedicated crews will be assigned to contract works. These crews will not be allocated to other sites until the day's work is confirmed as complete.

Lux Traffic ensures that we always have sufficient staff and resources to meet your needs. We understand that traffic control delays can impact the entire project, and we are dedicated to preventing such issues.

## Operations Supervisors

- Ensure all traffic control measures are implemented and maintained per the TMP and relevant regulations
- Maintain communication with affected stakeholders
- Conduct and document traffic control inspections, detailing any variations and reasons
- Review and act on feedback from inspections, worksite personnel, and the public
- Arrange and conduct necessary audits and incident investigations

## Site Supervisor and Crew Leaders

- Instruct workers on safety standards, including proper use of high-visibility vests
- Ensure traffic control measures are executed per the TMP
- Submit inspection and evaluation reports to management
- Assist road users and stakeholders during incidents affecting network performance or safety
- Correct unsafe conditions and modify the TMP as necessary

## Traffic Management Personnel

- Ensure at least one accredited individual in Basic Worksite Traffic Management is on site to set out traffic management devices per the TMP
- Ensure availability of at least one accredited Advanced Worksite Traffic Manager to manage site variations, contingencies, and emergencies

## Traffic Controllers

- Control road users to avoid conflicts with equipment, workers, and pedestrians, and manage traffic in emergencies
- Operate per Section 4.10 and Appendix C of AS1742.3
- Hold current Basic Worksite Traffic Management accreditation and Traffic Controller accreditation
- Take breaks as required by AS1742.3 and OS&H Regulations

# **SAFETY & COMPLIANCE**

# POLICIES AND PROCESSES

At Lux Traffic, our comprehensive policy framework is meticulously crafted and overseen by Employsure and our dedicated HR team, operations team, and field supervisors. This robust system plays a pivotal role in maintaining our third-party Quality and Health & Safety Accreditations through rigorous auditing processes.

Our compliance system adheres strictly to the stringent requirements of major corporations and councils, ensuring adherence to quality and safety practices. It encompasses a range of meticulously prepared documents including Handbooks, HSE Manuals, SWMS, Tool Box documentation, and thorough induction and compliance criteria.

Clients have full access to these reportable documents upon request, allowing for transparent inspection and verification of our practices. Additionally, our entire suite of documents and reference materials is readily accessible online to all Lux Traffic Management staff, facilitating seamless adherence to our high standards across all operations.

These measures ensure Lux Traffic can provide all listed services effectively and promptly, with multiple backup policies to guarantee complete and satisfactory work execution.

# RECORD KEEPING AND AUDIT REQUIREMENTS

The software utilised by Lux Traffic gives us access to our safety and compliance online and allow us to create and store all our safety and compliance forms online and in one place, with easy access for staff available to clients.

We can easily maintain our staff and fleet qualifications and view, store and track our fleet registrations, workforce inductions, and qualifications and automatically receive notifications when these are due for renewal or are no longer current, ensuring our bookings are fully compliant.
